

Announcement: IUPIACE™ LEMALLOY™ Price Increase
(m-Polyphenylene ether resin)

20th, May 2022

Here we, Mitsubishi Engineering Plastics Corporation (hereafter MEP) would like to ask your kind understanding to a price increase of “IUPIACE™” “LEMALLOY™” m-Polyphenylene ether resin.

Effective Jun 1st, 2022 MEP will increase the price of the products described below.

IUPIACE™ LEMALLOY™ All grades; USD0.6/kg (JPN64/kg) or higher

We have experienced continuous increases in main raw material and there is strong demand for m-Polyphenylene ether resin particularly in the automobile industry. Though we continued making every effort to streamline the production costs, recent cost increases exceed the range that can be offset by ourselves. As a result, it is necessary for us to implement a price increase on these products.

We kindly ask for your understanding on this matter, and thank you for your continued support and cooperation.

Please contact your MEP sales representative to ask any questions you may have.

We wish your continuous favor on our products.

Sincerely,
